Today’s world demands innovative thinkers: graduates from all backgrounds prepared to be highly collaborative problem solvers ready to tackle big challenges. At the University of Michigan we believe all students have the capacity to be innovators. Our campus-wide programs infuse diverse academic strengths in social sciences, arts, information studies, public health, medicine, law, and more into a unique experience of innovation, creativity and entrepreneurship. Through a highly immersive academic experience, U-M provides students with the knowledge, skills, and motivation to build the skills attributed to entrepreneurial behavior and innovative thinking necessary to succeed.

I believe my participation in this program to be one of the most valuable experiences that I will take away from my years here at the University of Michigan and am excited to see how it will unfold and effect all of our future endeavors.
